From the **fourth generation electronic Davey Bickford** firing system, the **OP DAVEYTRONIC** offers all the precision, simplicity and flexibility, at the right cost, and is particularly well suited to quarries, construction sites and small open pit mines.

Before initiating, a complete system check is performed by the firing console. The **OP DAVEYTRONIC** system allows you to manage the sequence of blasts to be done in order to minimize disturbances and optimize the result of the blast.
