DETONATING CORD

Image: cordeau_epc

The SEICORD is a detonating cord consisting of a core of PETN enclosed in a textile sheath and wrapped in plastic to protect it from mosture.

The SEICORD is available in different weights :

- SEICORD 6 grams / meters for initiating non-electric detonators.
- SEICORD 10, 12, 15 and 50 grams / meters for priming and explosive column.
- SEICORD 40 and 70 grams / meter for pre or post-cutting applications (embankments, tunnel cladding...)
